## **ROUND 2 HANDOUT – FULL-CONTACT GEOGRAPHY**

Each line below contains the capital cities of 2 countries. ***In 15 out of the 16 lines***, there is ***exactly one country*** that shares a land border with ***both*** of the implied countries. For each such pair, please ***identify the capital city*** of that mutually neighboring country. For example, if you were given Mexico City and Ottawa, the one country that touches both of their countries is the United States, so your answer would be the capital city WASHINGTON DC. ***In the one remaining line***, there is ***no country*** that shares a land border with both of the implied countries – in that one case, write “NONE” as that answer (do not just leave it blank). Some leniency as to spelling, spacing, and punctuation will be applied.

NOTES: (1) No country or capital is repeated either in a question or answer, so a completely correct answer sheet will have 50 different capital cities appearing on it -- 32 pre-printed below, 15 in your answers (along with 1 “NONE”), and 3 listed in the instructions above; (2) ignore any detached exclaves not part of a country’s mainland; and (3) the items below are listed simply alphabetically by the first given city listed, and thus the answers (and their associated countries, which you do not have to list) will not follow any predefined order.
