

GET IT TOGETHER

Oh no, the carefully assembled jigsaw answers to the clues have broken apart! Well, at least their letters remain in the proper order. Each numbered fragment contains either 1, 2, or 3 letters, and each fragment labeled with the same number is identical -- so, if a (12) contains exactly AR in one location, then all (12)s contain exactly AR. By seeing where the numbered fragments appear in multiple answers, and applying a little logic, you can determine the letter or letters in each fragment. Then, arrange the fragments in order from 1 to 17 to reveal a final answer phrase indicating this puzzle's true nature. (NOTE: One of the clue answers is a hyphenated word, four are 2-word phrases, and one is a 3-word phrase.)

Candidate's goal						
Dessert holder						
Getting the lead out, in a way						
Insensitive to musical or social matters						
Like great boxing match seats						
Not as tough						
Part of an orchestra						
Refreshing drink						
Religious art depicting two particular figures						
Short and sudden wrathful outburst						
Silver finish, typically						
Traditional margarita ingredient
